CHAPTER 1 INTRODUCTION

1.1 Introduction

This project let user to stay updated and connected with their respective hospital. Patients can book an appointment to their respective directly. No need to be queued.

For this Project (Hospital management System) I am using React JS, html, css, react js components, . Through out the while project for front-end.

Modules :

There are 6 different modules. I worked upon ...

1. Patients Portal
2. Doctors Availability
3. Specialists
4. Contact Us
5. Feedback/Query
6. Career

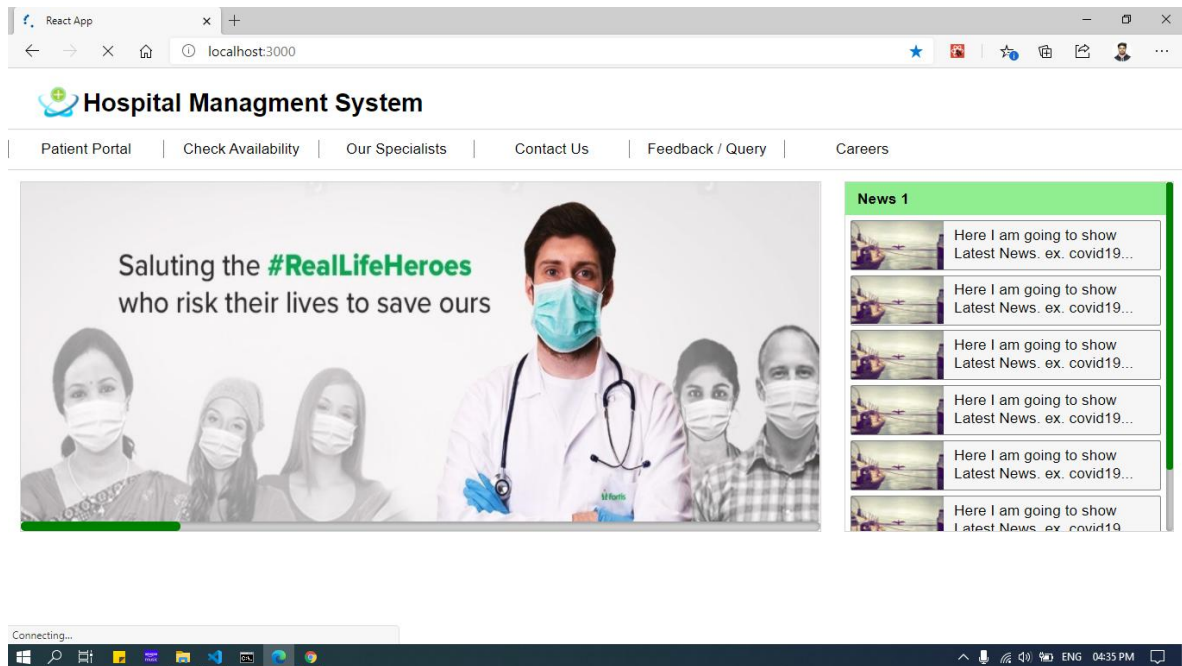

Image 1.1

This is the homepage.
